**NOTICE OF SOUTHERN CALIFORNIA EDISON
COMPANY APPLICATION TO RETURN
REVENUES FROM THE SALE OF GREENHOUSE
GAS ALLOWANCES AND TO RECOVER COSTS
ASSOCIATED WITH THIS PROGRAM
(A.13-08-002)**

SUMMARY

On August 1, 2013, Southern California Edison Company (SCE) submitted an application to the California Public Utilities Commission (CPUC) to forecast revenues from the sale of greenhouse gas (GHG) allowances under California's GHG emissions reduction program, and to recover the administrative and outreach costs related to this program in 2014. If this application is approved, SCE will return revenues from the program—less program administration and outreach costs—to customers via bill credits. These revenues could be returned as early as February 2014.

ABOUT THE PROGRAM TO REDUCE GHG EMISSIONS

The California Air Resources Board (CARB) encourages the reduction of greenhouse gas (GHG) emissions by placing a cap on the amount of GHG emissions a facility can emit. This is regulated through the implementation of GHG allowances, or permits. Under California's GHG reduction program, starting in 2013, CARB allocated SCE and other California utilities GHG emissions allowances to be sold for the benefit of customers and to mitigate the cost impact of the program. SCE is required to sell its allowances in an auction and pass the revenue from the sale to its customers, less some expenses for administration and outreach costs. SCE does not profit from the sale of these GHG allowances.
